

Venture Acceleration Centre

iAxil, the venture accelerator arm of Ascendas, is a one-stop centre providing a total solution to help entrepreneurs launch and grow their ventures. Leveraging on more than 15 years of experience, we have grown into one of the region's leading venture acceleration centres offering entrepreneurs access to seed and venture capital, business and financial planning, market intelligence, IP management, recruitment, branding, access to overseas markets and quick startup space.

Like the axil of a branch, iAxil supports and connects new ventures to its established consortium of experts and a global network of strategic partners.

We provide:

- **Venture Acceleration Program** is a program that helps entrepreneurs and startups plug the gaps at different stages of growth i.e. from the idea stage to developing their business model to setting up their company, to managing their intellectual property, to developing and deploying their products in the marketplace, and finally to expansion and growth.
- **EiR and Mentoring Programs** are programs that link our startups to our distinguished mentors who are typically successful entrepreneurs, CEOs, venture capitalists and industry experts so as to allow our startups to acquire business acumen and to gain access to a collective pool of knowledge and experience from our mentors.
- **Global Market Access Program** is a program that is targeted at companies with proven products and solutions and that are ready to expand overseas. We work with in-market experts and venture accelerators located in countries in North America, Europe and Asia with established networks on the ground in these countries and who can conduct market research, competitor analysis, market access strategies, partner sourcing, client development and helping our startups to set up a market presence in the country.
